

Roofing

Career Paths & Interim Credentials

The following graph represents the format for NCCER's Roofing Curriculum based on industry-desired career paths. Roofing has two possible careers paths: Steep-Slope Roofer and Low-Slope Roofer.

Roofing Levels 1 & 2 offer interim credentials for two distinct career plans culminating in a full craft completion.

 Unique Module

 *Overlapping Modules include:
Introduction to Roofing, Roofing Safety, Fall Protection Orientation, Drawings in Roofing, Introduction to Steep-Slope Roofing, Introduction to Low-Slope Roofing, Substrates/Decks/Roof Insulation, Sheet Metal in Roofing, Rigging Practices and Metal Roof Systems
