

NCCER Roofing 2nd Edition

The demand for qualified workers in roofing increases the need for rigorous training.

NCCER developed Roofing in partnership with the National Roofing Contractors Association (NRCA). This program will raise awareness of careers in roofing, enhance installer professionalism and increase the number of ProCertified* applicators in the industry.

Training With Purpose

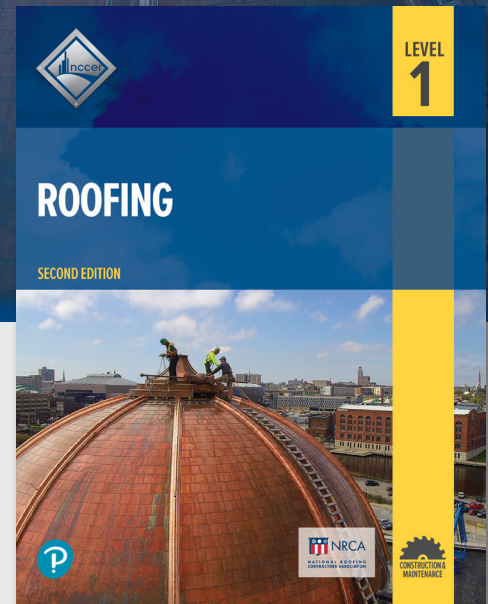

NCCER's Roofing builds a career path from education to credentials and certification by providing training on a variety of roofing systems.

NCCER developed Roofing in partnership with the National Roofing Contractors Association (NRCA) and prepares trainees to sit for NRCA's ProCertification* exams.

Content Includes:

- Steep-slope and low-slope roofing systems
- Specific training, including asphalt shingles and liquid applied systems
- Up-to-date industry images
- Safety, drawings, substrates and more
- Two interim credentials: Steep-slope roofer and low-slope roofer

* The ProCertification program certifies workers using a series of assessments specific to each type of roof system allowing them to earn professional credentials.

About NCCER

NCCER is a not-for-profit 501(c)(3) education foundation that provides portable, industry-recognized credentials and certifications for skilled craft professionals. Our comprehensive workforce development system includes accreditation, training, assessment, certification and career development solutions for the construction and maintenance industries.
